Table 1. MINIMUM NUMBER OF DOSES REQUIRED FOR CERTIFICATE OF IMMUNIZATION

[illegible]

a: Vaccine doses administered ≤ 4 days before the minimum interval or age are to be counted as valid

b: Five doses of pertussis, tetanus, and diphtheria vaccines are required at school entry in Colorado unless the 4th dose was given at ≥ 48 months (i.e., on or after the 4th birthday) in which case only 4 doses are required

c: For students ≥ 7 years who have not had the required number of pertussis doses, no new or additional doses are required. Any student ≥ 7 years at school entry in Colorado who has not completed a primary series of 3 appropriately spaced doses of tetanus and diphtheria vaccine may be certified after the 3rd dose of tetanus and diphtheria vaccine (or tetanus, diphtheria, and pertussis vaccine if 10 or 11 years) if it is given > 6 months after the 2nd dose.

d: The student must meet the minimum prior requirement for the 4th or 5th doses of diphtheria, tetanus, and pertussis vaccine and have 1 tetanus, diphtheria, and pertussis vaccine dose.

e: For polio, in lieu of immunization, written evidence of a laboratory test showing immunity is acceptable.

f: Four doses of polio vaccine are required at school entry in Colorado unless the 3rd dose was given ≥ 48 months (i.e. on or after the 4th

birthday) in which case only 3 doses are required. Four valid doses are a complete series regardless of age at completion.

g: For measles, mumps, and rubella, in lieu of immunization, written evidence of a laboratory test showing immunity is acceptable for the specific disease tested. The 1st dose of measles, mumps, and rubella vaccine must have been administered at ≥ 12 months of age (i.e., on or after the 1st birthday) to be acceptable.

h: The 2nd dose of measles vaccine or measles, mumps, and rubella vaccine must have been administered at least 28 calendar days after the 1st dose.

i: Measles, mumps, and rubella vaccine is not required for college students born before January 1, 1957.

J: The number of Hib vaccine doses required depends on the student's current age and the age when the vaccine was administered. If any dose was given ≥ 15 months, the Hib vaccine requirement is met. For students who began the series < 12 months, 3 doses are required of which at least 1 dose must have been administered at ≥ 12 months (i.e., on or after the 1st birthday). If the 1st dose was given at 12 to 14 months, 2 doses

are required. If the current age is ≥ 5 years, no new or additional doses are required.

k: The number of pneumococcal conjugate vaccine doses depends on the student's current age and the age when the 1st dose was administered. If the 1st dose was administered at:

- (i) ≤ 6 months, 3 doses are required at 6 to 14 months and 4 doses are required at 15 to 23 months with 1 dose administered on or after the 1st birthday;
- (ii) 7 to 11 months, 2 doses are required at 6 to 14 months and 3 doses are required at 15 to 23 months with 1 dose on or after the 1st birthday;
- (iii) 12 to 23 months, 2 doses are required. If the current age is ≥ 2 years, no new or additional doses are required.

I: For hepatitis B, in lieu of immunization, written evidence of a laboratory test showing immunity is acceptable. The second dose should be administered at least 4 weeks after the first dose, and the third dose should be administered at least 16 weeks after the first dose and at least 8 weeks after the second dose. The final dose is to be administered at 24 weeks of age (6 months of age) and is not to be administered prior to that age.

m: For varicella, written evidence of a laboratory test showing immunity or a documented disease

history from a health care provider is acceptable. The 1st dose of varicella vaccine must have been administered at ≥ 12 months of age (i.e., on or after the 1st birthday) to be acceptable.

n: If the second dose of varicella vaccine was administered to a child <13 years, the minimum interval between dose 1 and dose 2 is 3 months, however, if the second dose is administered at least 28 days following the first dose, the second dose does not need to be repeated. For a child who is ≥13 years, the second dose of varicella vaccine must have been administered at least 28 calendar days after the 1st dose. See Table 2 for the school years/grade levels that the 1st and 2nd doses of varicella will be required.

o: If the 1st dose of varicella vaccine was administered at ≥ 13 years, 2 doses are required, separated by a minimum of 4 to 8 weeks.

p: Information concerning meningococcal disease and the meningococcal vaccine shall be provided to each new student or if the student is under 18 years, to the student's parent or guardian. If the student does not obtain a vaccine, a signature must be obtained from the student or if the student is under 18 years, the student's parent or guardian indicating that the information was reviewed.

**Table 2. TIMETABLE FOR IMPLEMENTATION OF REQUIREMENTS FOR
SELECTED IMMUNIZATIONS FOR GRADES K TO 12**

Refer to Table 1 for the minimum number of doses required for a particular grade level. Table 2 shows the year of implementation for a requirement from Table 1 and is restricted to varicella vaccine dose 1 (Var1) and dose 2 (Var2) and tetanus, diphtheria, and pertussis vaccine (Tdap). Requirements and effective dates for other vaccines are listed in Table 1. In this table, after a vaccine is required for grades K to 12, it is no longer shown, but the requirements listed in Table 1 continue to apply.
